Science Starters: Elementary Chemistry and Physics Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Chemistry Investigate the Possibilities Elementary Chemistry-Matter Its Properties & Its Changes: Infused with fun activities and applied learning, this dynamic, full-color book provides over 20 great ways to learn about bubbles, water colors, salt, and the periodic table, all through interactive lessons that ground students in their faith in God. Help tap into the natural curiosity of young learners with activities that utilize common household items and teach them why and how things work, what things are made of, and where they came from. Students will learn about the physical properties of chemical substances, why adding heat causes most chemical changes to react faster, the scientist who organized a chart of the known elements, and the difference between chemical changes and physical changes. Semester 2: Physics Investigate the Possibilities Elementary Physics-Energy Its Forms, Changes, & Function: This remarkable, full-color book is filled with experiments and hands-on activities, helping 3rd to 6th graders learn how and why magnets work, different kinds of energy from wind to waves, and concepts from nuclear power to solar energy. Science comes alive as students are guided through simplified key concepts of elementary physics and hands-on applications. Students will discover what happens to light waves when we see different colors, how you can see an invisible magnetic field, the essential parts of an electric circuit, and how solar energy can be changed into electric energy. Investigate the wonderful world God has made with science that is both exciting and educationally outstanding in this comprehensive series!

Language has always been the medium of instruction, but what happens when it becomes a barrier to learning? In this book, Jane Hill and Kirsten Miller take the reenergized strategies from the second edition of Classroom Instruction That Works and apply them to students in the process of acquiring English. New features in this edition include * The Thinking Language Matrix, which aligns Bloom's taxonomy with the stages of language acquisition and allows students at all levels to engage in meaningful learning. * The Academic Language Framework, an easy-to-use tool for incorporating language-development objectives into content instruction. * Suggestions for helping students develop oral language that leads to improved writing. * Tips for Teaching that emphasize key points and facilitate instructional planning. Whether your students are learning English as a second language or are native English speakers who need help with their language development, this practical, research-based book provides the guidance necessary to ensure better results for all.
