How to get the most out of your cycling training--the tricks of the trade from the inimitable Graeme Obree. No one but Graeme Obree has the clarity of vision to get to the heart of the problem of how to improve as a racing cyclist. His innovative approach took him to the top of world cycling, twice breaking the world hour record. This is a practical guide to revolutionizing your cycling training--applicable to all cyclists, from the weekend warrior to the serious competitor. The Obree Way swerves conventional wisdom and strips cycling back to its elements, always asking the question: "What actually improves my race time?" Fully updated and including two new chapters, the new edition of this cycling classic explains Graeme Obree's radical insights into technique, training, psychology, and diet, as well as the clear logic behind them.

We revisit Lipset 's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

We describe in this book, new methods and applications of hybrid intelligent systems using soft computing techniques. Soft Computing (SC) consists of several intelligent computing paradigms, including fuzzy logic, neural networks, and evolutionary algorithms, which can be used to produce powerful hybrid intelligent systems. The book is organized in five main parts, which contain a group of papers around a similar subject. The first part consists of papers with the main theme of intelligent control, which are basically papers that use hybrid systems to solve particular problems of control. The second part contains papers with the main theme of pattern recognition, which are basically papers using soft computing techniques for achieving pattern recognition in different applications. The third part contains papers with the themes of intelligent agents and social systems, which are papers that apply the ideas of agents and social behavior to solve real-world problems. The fourth part contains papers that deal with the hardware implementation of intelligent systems for solving particular problems. The fifth part contains papers that deal with modeling, simulation and optimization for real-world applications.

A history of the Korean War with soldier ' s-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao ' s direct involvement in the conflict. Toland supplements his captivating history with

in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

The 2014 *Electricity Profiles* publication provides an overall picture of the electricity sector of over 200 countries and areas on an internationally comparable basis, for the years 2009-2014. It displays detailed information on production, trade and consumption of electricity, on net installed capacity and thermal power plant inputs and efficiency relevant to each of these countries and areas. This is the third issue of *Electricity Profiles* as a stand-alone publication, replacing the previous series of *Energy Balances and Electricity Profiles*.
