The Process of Parenting is a comprehensive introduction to parenting that describes the many ways parents and caregivers can translate their love and concern for children into effective parenting behavior. With a strong emphasis on the developmental process and on the changing nature of parent–children relationships over time, the book presents a wide range of theories and research with a focus on real-life applications. Because parents and children are distinct individuals, a problem-solving approach is emphasized that can help parents arrive at solutions that fit them, their children, and their life circumstances. Two basic tasks of parenting are emphasized as ultimate ends: creating close emotional relationships with children and supporting the development of children's full potential.

This edition examines the philosophical, historical and methodological foundations of psychological testing, assessment and measurement, while helping students appreciate their benefits and pitfalls in practice.
