The Arcadian returns to the dark ice in a reprisal of one of his first and most deadly missions. But this time the stakes couldn't be higher. In 2008, a top secret US submarine went missing on its test voyage off the coast of Antarctica. After years of silence, its emergency beacon is suddenly activated, but strangely, the beacon is emanating from a point miles below the ice sheets of the frozen continent. The race is on. The Chinese government, alerted at the same time as the Americans, is after the submarine's secrets. And the Americans need to retrieve their technology, quickly and quietly, from a place now marked as an international forbidden zone. With the reluctant assistance of petrobiologist Aimee Weir, Alex Hunter and his team of HAWCs return to the location of their first mission together. But only a few members of the team know the truth. A treacherous horror lies in wait for them, deep beneath the Antarctic ice. A direct follow up to 2009's Beneath the Dark Ice this thriller is packed with mystery and suspense, and perfect for fans of Matthew Reilly, Steve Alten, Myke Cole, Graham Masterton, James Rollins and Michael Crichton.

When a massive amount of gamma radiation is detected somewhere beneath the desert of Iran, the world is on edge. Is it a nuclear weapon—or worse? Alex Hunter and his highly trained incursion team is on a mission to find out. When they arrive at the ruins of Persepolis, they find an underground facility

but no lab, no weapons, no scientists—not even radiation. A black hole has taken everything... Meanwhile, Iran is preparing for the return of the prophet. Israel is threatening nuclear war. And the details about Alex's special U.S. military venture—code name: Arcadian—have been stolen. Then another gamma spike is detected...and someone, or something, is draining the fluids from the bodies of Iranian soldiers in the desert. Now it's up to Alex to follow the traces of radiation all the way to the ancient caves of Arak, where he'll come face to face with a creature from his darkest nightmares. Is it game-over for Alex and his team? Or are greater forces at work as the world reaches its natural end—and mankind casts its final judgment?

In the jungles of Paraguay, Dr Aimee Weir and her team are in trouble. While drilling deep into the Earth a contagion strikes, their camp is quarantined, but workers start to vanish in the night. Is it fear of contamination – or has something far more lethal surfaced? Alex Hunter – code name Arcadian – and his Hotzone All-Forces Warfare Commandos are dropped in to the disaster area to do whatever it takes to stem the outbreak. But for the mission to be a success, the Arcadian must learn to master his violent inner demons long enough to confront the danger that not only threatens his own immediate survival, but that of mankind. 'top sci-fi horror ... page-turning thrills and spills' – Daily Telegraph

Alex Hunter, code named Arcadian, wakes up with no knowledge of who he is, in the care of a woman he doesn't recognise, in a country not his own. But there is a calling deep within him, to return home to Black Mountain. Formed a billion years ago, the Appalachian's Black Mountain hosts a terrible legend. Only one elder remains to guard its long-forgotten, deadly secret and there is a fear that there is evil lurking again. Some hikers have gone missing, and the rescue team sent to search for them has not

returned. Meanwhile, in nearby Ashville, Professor Matt Kearns is drawn into the mystery of an ancient artefact recovered from the mountainside, and an image too grotesque to be real. A survivor is then found half-alive, covered in blood – blood revealed to be not quite human. Alex must confront an age-old enemy of man and discover the truth about his past, and confront the horror that stalks the frozen mountain, and also the one haunting his very soul.

An aeon ago it crashed into the frozen earth. Millennia later it was removed from the icy soil, still functioning. They opened it ... they shouldn't have. Alex Hunter – in the mission that turned him from a normal man into the weapon known as the Arcadian – and the elite team of soldiers known as the Hotzone All-Forces Warfare Commandos must enter a hostile country to rescue a defected Chechen researcher from the center of a country at war. But the HAWCs are not the only ones looking for the rogue scientist and the mysterious package he carries with him. A brutal and relentless killer and his death squad are on the trail too – and they bring a savagery with them that Hunter and his team have never witnessed before in modern warfare. In this stunning prequel to *Beneath the Dark Ice*, the HAWC team must race the clock to rescue the scientist, prevent the package from falling into the wrong hands ... and save the world from a horror that should never have been woken. *Arcadian Genesis* features a sample chapter from Greig Beck's forthcoming novel *Black Mountain*.

The New York Times bestselling sequel to the bestsellers *The Six Sacred Stones* and *Seven Deadly Wonders*. beyond imagination. Strap yourself in and hold on tight as he unleashes his biggest and fastest adventure yet, *The 5 Greatest Warriors*. When we last left Jack West Jr., he was plummeting into a fathomless abyss and his quest to save the world from impending Armageddon appeared doomed. But all hope is not lost. After an astonishing escape, Jack regroups with his trusty team. Racing to rebuild the final pieces of the fabled “Machine,” they discover an ancient inscription containing a rhyme about five mysterious unnamed warriors—great historical figures whose knowledge will be vital to unlocking the secrets of the Machine and its long-lost “pillars.” But the ancients have hidden their secrets well, and with each pillar bestowing an incredible power upon its holder, their pursuit has attracted the attention of other forces from around the world—some who want to rule it and others who want to see it destroyed. With enemies coming at him from every side and the countdown to doomsday rapidly approaching, Jack and his team had better move fast. Because they are about to find out what the end of the world looks like...

Hundreds of thousands of miles away on the dark side of the moon, the Russian lunar base has self-destructed - all personnel are dead, except one. Olga Sobakin, the lone survivor, seeks refuge at the rival American base. Olga tells the Americans her base was attacked by a horrifying and nightmarish creature - the pattern was the same: people vanished, leaving nothing behind but shredded clothing and an unidentifiable waste product. The Americans are skeptical of her story at first, but then people begin to disappear . . . Back on Earth, just before the American lunar base goes completely dark, a single message is received: "Lifeform". Intercepted whisperings from Russian intelligence indicate a deadly spreading attack and a rising global threat. Escalated to priority one, there's only one team up for the task. Alex Hunter and his elite group of HAWCs are on a rescue mission to the desolate and darkest unknown.
