## Managing and marketing through motivation.

The advent of small, affordable ultrasound machines and the widespread use of PACS systems have made imaging more accessible to anaesthetists and intensivists than ever before. This concise, highly illustrated text discusses the key aspects of radiology, examining all imaging modalities and body regions. Introductory sections review the imaging knowledge required for the FRCA exams and the role of imaging in the Pre-Operative Assessment. These are followed by chapters on each imaging modality and body region, each containing numerous illustrations, practical advice on diagnosis, and many case illustrations. Each modality chapter contains a concise introductory section on the principles of image formation. Containing over 300 scans and illustrations, and written by a multidisciplinary team of radiologists and anaesthetists, *Radiology for Anaesthesia and Intensive Care*, second edition, is an invaluable aid for all anaesthetists and intensivists.

A field manual to the technologies that are transforming our lives Everywhere we turn, a startling new device promises to transfigure our lives. But at what cost? In this urgent and revelatory excavation of our Information Age, leading technology thinker Adam Greenfield forces us to reconsider our relationship with the networked objects, services and spaces that define us. It is time to re-evaluate the Silicon Valley consensus determining the future. We already depend on the smartphone to navigate every aspect of our existence. We're told that innovations—from augmented-reality interfaces and virtual assistants to autonomous delivery drones and self-driving cars—will make life easier, more convenient and more productive. 3D printing promises unprecedented control over the form and distribution of matter, while the blockchain stands to revolutionize everything from the recording and exchange of value to the way we organize the mundane realities of the day to day. And, all the while, fiendishly complex algorithms are operating quietly in the background, reshaping the economy, transforming the fundamental terms of our politics and even redefining what it means to be human. Having successfully colonized everyday life, these radical technologies are now conditioning the choices available to us in the years to come. How do they work? What challenges do they present to us, as individuals and societies? Who benefits from their adoption? In answering these questions, Greenfield's timely guide clarifies the scale and nature of the crisis we now confront—and offers ways to reclaim our stake in the future.

The Regulatory Technology Handbook The transformational potential of RegTech has been confirmed in recent years with US\$1.2 billion invested in start-ups (2017) and an expected additional spending of US\$100 billion by 2020. Regulatory technology will not only provide efficiency gains for compliance and reporting functions, it will radically change market structure and supervision. This book, the first of its kind, is providing a comprehensive and invaluable source of information aimed at corporates, regulators, compliance professionals, start-ups and policy makers. The REGTECH Book brings into a single volume the curated industry expertise delivered by subject matter experts. It serves as a single reference point to understand the RegTech eco-system and its impact on the industry. Readers will learn foundational notions such as:

- The economic impact of digitization and datafication of regulation
- How new technologies (Artificial Intelligence, Blockchain) are applied to compliance
- Business use cases of RegTech for cost-reduction and new product origination
- The future regulatory landscape affecting financial institutions, technology companies and other industries

Edited by world-class academics and written by compliance professionals, regulators, entrepreneurs and business leaders, the RegTech Book represents an invaluable resource that paves the way for 21st century regulatory innovation.

Infinite Playlists is a handy guide to healthy conversation between parents and kids. Writing as both father and music-lover, Stocker calls parents to recognize music as a gift from God so they can help their kids determine the emotional, physical, and spiritual influences of their song choices. He offers a balanced look at the difference between Christian and secular music, and gives practical guidelines parents and kids can follow to choose appropriate music—together.

Explains the essential steps of hypnosis and goal-directed relaxation, and shows how to use them to deal with a variety of problems, from controlling pain and relieving allergies to overcoming insomnia and phobias

In 2013, the Robert Wood Johnson Foundation (RWJF) began its Culture of Health initiative. To implement the primary Culture of Health outcome of improved population health, well-being, and equity, RWJF worked with RAND to develop an action framework.
