Check with the Gizmo arc measure and length rulers. With the rulers in place, drag points C, D, K, and L around to see if these relationships are true for all congruent central angles and their intercepted arcs and chords. 2. Under Conditions, select Congruent arcs. On the figure to the right, sketch the central angles that intercept these arcs. How do

April 25th, 2018 - Arc and Chords Arc and Chords Arc is a part of a circle and chord is a segment whose end points are on the circle Some Definitions related to Arc Chords are Congruent circles Two circles are said to be congruent if and only if their radii are equal"CHORDS AND ARCS GIZMO

Chords And Arc

If $\widehat{GF} \cong \widehat{JK}$ and $\angle G \cong \angle J$, what can you conclude about the minor arcs, the major arcs, and the circles in general? Given that angle G is congruent to angle J, minor arc HF is congruent to minor arc IK, and major arc HF is congruent to major arc IK. Thus, given this information, we can conclude that circle G is congruent to circle J. If $\widehat{IK} \cong \widehat{JK}$, find $m\angle J$.
