Incomplete dominance results in a blending of traits such as a red and white flower producing a pink flower or a black cow crossing with a white bull having a brown calf.

Codominance shows both colors of the parents in the offspring. Black Angus cattle that breed to Hereford cattle typically have calves with a black body and a white face.

Students also mistakenly think that dominant/recessive relationships are the norm. This is largely because almost all the alleles they see in their genetics course are presented in dominant/recessive pairs, with alternatives presented only as variants of or exceptions to dominance (“ codominance ” and “ incomplete dominance ”).
