At the legislative elections held on 24 October 2004 the party won 45.4% of the popular vote andf 47 out of 120 seats, seven of which have defected to the Nexhat Daci -led Democratic League of Dardania. One of the founding members, Ibrahim Rugova was the president of the party as the president of Kosovo until his death, on 21 January 2006.

In Dying Justice, Jocelyn Downie provides an up-to-date and comprehensive review of significant developments in the current legal status of assisted death in Canada.

In recent decades, linguists have significantly advanced our understanding of the grammatical properties of evidentials, but their social and interactional properties and uses have received less attention. This volume, originally published as a special issue of Pragmatics and Society (issue 3:2, 2012), draws together complementary perspectives on the social and interactional life of evidentiality, drawing on data from diverse languages, including Albanian, English, Garwa (Pama-Nyungan, Australia), Huamalfex Quechua (Quechuan, Peru), Nanti (Arawak, Peru), and Pastaza Quichua (Quechuan, Ecuador). The language-specific studies in this volume are all based on the close analysis of discourse or communicative interaction, and examine both evidential systems of varying degrees of grammaticalization and 'evidential strategies' present in languages without grammaticalized evidentials. The analyses presented draw on conversational analysis, ethnography of communication, ethnopoetics, pragmatics, and theories of deixis and indexicality, and will be of interest to students of evidentiality in a variety of analytical traditions.

Charting the path from intervention to integration Europe and the Post-Yugoslav Space examines the role of Europeanization on the development of the countries of the former Yugoslavia. Slovenia, Croatia, Macedonia, Montenegro, Serbia, Bosnia and Herzegovina and Kosovo may have a shared history but their experiences, views and attitudes to European integration vary dramatically. Opinion within each state is often equally as keenly divided as to the benefits of active membership. The debate within each country and their comparative differences in approach provide fascinating case studies on the importance and relevance of the EU and the effectiveness of Europeanization. A wide range of contributors with significant experience gained within the EU as well as their country of origin use their expert understanding of the language and cultures of the countries concerned to provide detailed and rich insights into the troubled history and potential of the post-Yugoslav space.

Since the collapse of the Soviet Union, Russians have seen the ruble steadily lose ground to alternative means of payment such as barter and privately issued quasi-monies. Industry now collects as much as 70 percent of its receipts in nonmonetary form, leaving many firms with too little cash to pay salaries and taxes. In this ground-breaking book on the Russian economy, David Woodruff argues that Moscow's inability to control the nation's currency is not a carry-over from the Soviet past. Rather, the Russian government has failed to build the administrative capacity and political support demanded by monetary consolidation—a neglected but crucial aspect of capitalist statebuilding. Drawing on a vast array of empirical evidence, Woodruff shows how the widespread use of barter arose as local authorities tried to protect industry against the destructive effects of price increases and crude tax and accounting systems. As businesses fled or were driven from the money economy, provincial governments invented new ways to tax in kind and issued substitutes for the ruble. In turn, the federal authorities, unable to coerce firms either to operate in the money economy or to abandon business altogether, were forced to make accommodations to barter and to ruble alternatives. Woodruff describes the enormous fiscal difficulties that resulted and recounts the intense political battles over attempts to address the problem. Through an overview of monetary consolidation in other nations, Woodruff demonstrates that the struggles of the new Russian state have much to teach us about the political history of money worldwide. Sovereignty over money cannot, he argues, be imposed by government on a recalcitrant society. Nor can it be assumed as a by-product of disciplined policies aimed at market reform. Monetary consolidation is, at heart, a political achievement requiring political support.

This new translation of Aristotle's Politics is a model of accuracy and consistency and fits seamlessly with the translator's Nicomachean Ethics, allowing the two to be read together, as Aristotle intended. Sequentially numbered endnotes provide the information most needed at each juncture, while a detailed Index of Terms indicates places where focused discussion of key notions occurs. A general Introduction prepares the reader for the work that lies ahead, explaining what sort of work it is and what sort of evidence it relies on.

Wastewater pollution is a major issue in the context of the future circular economy because all matter should be ultimately reused, calling for efficient depollution techniques. This book present timely reviews on the treatment of wastewater contaminated by organic pollutants, with focus on aerobic granulation and degradation. Organic pollutants include microplastics, phthalates, humic acids, polycyclic aromatic hydrocarbons, pharmaceutical drugs and metabolites, plastics, oil spills, petroleum hydrocarbons, personal care products, tannery waste, dyes and pigments.
