trusts (REITs) to earn income beyond purely passive sources such as rents from real property or interest from mortgages on real property. As a result, both the number and market capitalization of hotel REITs have substantially increased, and the difference between hotel REITs and hotel C-corporations has narrowed.

However, companies such as Starwood Hotels have reverted back to the C-corporation structure. Given these organizational changes and the increasing dominance of hotel REITs, there is a need to analyze hotel REITs and hotel C-corporations in a comparative framework.

Equity REITs and C-corporations have been studied extensively.

However, research on various organizational forms in the hospitality industry is somewhat limited. This study attempts to fill this gap by comparing the stock market performance of publicly traded hotel REITs with hotel C-Corporations from 1993 to 2011.

Furthermore, the impact of significant events such as mergers and acquisitions and legislative amendments on firms' stock price are also observed. Finally, detailed case studies of companies that underwent corporate restructuring are conducted. The research objective of this thesis is to examine (a) whether REITs are an efficient organizational structure for the lodging industry; and (b) whether the tax benefits of REITs offset the regulatory constraints they face. The study infers that REIT acquirers have an advantage in mergers and acquisitions, but in all other situations, the net benefits of REITs are not as clear. On market cap basis, the performance of hotel REITs and hotel C-Corporations was almost identical, however when equally weighted, hotel REITs outperformed their C-Corporation counterparts. In addition, the results show that the REIT returns are highly volatile. On a broad

level the hospitality business has two distinct segments -- ownership of hotels and management of hotels and the degree of operating flexibility offered is one of the main factors that differentiate REITs from the C-Corporation counterparts. Therefore, this study concludes that the choice of corporate structure depends greatly on a firm's business strategy.

The tourism industry, of which the hospitality industry is the core element, is one of the largest and the fastest growing industries world-wide. According to World Tourism Organisation forecasts, the industry will continue to grow and employ more people in the twenty-first century. In this business environment of heightened consumer expectations, distinct market segments that demand unique products and services, and stiff competition, tourism and hospitality organisations are looking for ways to excel in service quality, customer satisfaction, competition and performance. This book takes the view that employees are one of the most, if not the most, important resources or assets for tourism and hospitality organisations in their endeavour to provide excellent service, meet and exceed consumer expectations, achieve competitive advantage and exceptional organisational performance. The purpose of this book is to emphasise the critical role of employees for tourism and hospitality organisations and to examine
