When Luke Starbuck takes on a wealthy banker as a client, the only thing more compelling than the paycheck is his prey. The James-Younger gang has confounded countless detectives, including the men of the Pinkerton Agency. Now it's Starbuck's chance to bring down the most notorious group of outlaws the West has ever seen—led by none other than cold-blooded killer Jesse James. From Kansas City straight through the Indian Territory, Starbuck's mission is about to become a down-and-dirty vendetta that will leave one man standing...and the other six feet under. Five thousand dollars. That was what a slick Denver lawyer offers to pay the legendary manhunter Luke Starbuck. The job: to find a way into Wyoming's infamous Hole-in-the-Wall outlaw stronghold—and shoot a bad man dead. And no sooner does Starbuck enter the foothills of the Big Horns does he realize that he is the one who's being hunted. Now, Starbuck must make his way among lawmen, gunmen, and free spirits riding on both sides of the law to figure out who wants him dead...all the way to the Badlands town called Deadwood, where secrets are sealed in blood.

Critical literacy investigates how forms of knowledge, and the power they bring, are created in language and taken up by those who use texts. It asks how language might be put to different, more equitable uses, and how texts might be recreated in a way that would tell a different story. This book is a carefully documented and critically analysed example of the growing emphasis on critical literacy in syllabuses, government reports and the like. It: \* bridges the gap between academics' theorizing and teachers' work \* describes how secondary teachers have planned and implemented critical literacy curricula on a range of topics, from Shakespeare to the workplace \* listens to teachers reflecting on their teaching and analyses classroom talk \* extrapolates from present practice to a future critical literacy in a digitised, hypermedia world. Teachers and students of education, critical literacy advocates and theorists of literacy and schooling can learn much more from this book, which shows how critical literacy teachers, and their students are contributing to the ongoing reinvention of English education as critical literacy.

This monograph is a progressive introduction to non-commutativity in probability theory, summarizing and synthesizing recent results about classical and quantum stochastic processes on Lie algebras. In the early chapters, focus is placed on concrete examples of the links between algebraic relations and the moments of probability distributions. The subsequent chapters are more advanced and deal with Wigner densities for non-commutative couples of random variables, non-commutative stochastic processes with independent increments (quantum Lévy processes), and the quantum Malliavin calculus. This book will appeal to advanced undergraduate and graduate students interested in the relations between algebra, probability, and quantum theory. It also addresses a more advanced audience by covering other topics related to non-commutativity in stochastic calculus, Lévy processes, and the Malliavin calculus.

Master's Thesis from the year 2005 in the subject Law - Comparative Legal Systems, Comparative Law, grade: 53(60), Université Paul Cézanne Aix - Marseille III, course: European Master in Law and Economics, 37 entries in the bibliography, language: English, abstract: Copyright protection in the media and especially in the music industry is a widely discussed topic since several years. In fact new technologies based on Internet changed the situation for the classic business model of the music labels dramatically. CDs become more and more superfluous with the advent of digital media and thus the traditional business model producing and selling them. The music industry of course makes these new technologies responsible for their decline in sales while others argue that the new technologies moreover offer great opportunities for the industry to expand their markets. However I will not join the discussion whether online file sharing is responsible for the decline in record sales<sup>2</sup>. I rather will show that the new technologies being introduced offer great chances for new ways of producing and distribution of music, no matter the impact it has on the old and outdated business models by selling CDs. In my thesis I try to give some insights into the current dilemma, discuss the most appealing proposals advanced by legal and economic scholars and, finally, provide my own suggestions without neglecting the current political circumstances. Therefore I will give some background information of what is actually going on right now in the markets for music in the second chapter. Then I will shed some light on the basic foundations of copyright, its economic impacts and of course its inefficiencies according the music business. After having analyzed the economic consequences of current copyright laws I will introduce and comment on some recent suggestions to ameliorate the inefficiencies. This will be proposals from single changes of particular parts of copyright to radical abandonment of copyright law at all. In order to ameliorate the dilemma given I will give some suggestions for the short respectively the long run. Unlike the existing literature I will therefore consider current copyright policies in major markets which I will shortly introduce. Furthermore I will argue that copyright might be seen differently in different markets. These are the end-consumer market, the intra-business and the extra-business market as being introduced in the following.

To free his father and himself from his mother's tyranny, Pierre Rivière decided to kill her. On June 3, 1835, he went inside his small Normandy house with a pruning hook and cut to death his mother, his eighteen-year-old sister, and his seven-year-old brother. Then, in jail, he wrote a memoir to justify the whole gruesome tale. Michel Foucault, author of *Madness and Civilization* and *Discipline and Punish*, collected the relevant documents of the case, including medical and legal testimony, police records. and Rivière's memoir. The Rivière case, he points out, occurred at a time when many professions were contending for status and power. Medical authority was challenging law, branches of government were vying. Foucault's reconstruction of the case is a brilliant exploration of the roots of our contemporary views of madness, justice, and crime.

London waitress Pippa Taylor has no interest in horses or country-living. But when she inherits Peace Offering, a hopeless racehorse, she embarks on a career change in order to see her late uncle's wish to run him in the Grand National come true. \* But having talked her way into a job as racing secretary to a champion National Hunt trainer and moved to the West Country, Pippa finds herself faced with more daunting obstacles than even the Grand National can throw at her. \* Most take the form of Jack Carmichael, her moody boss. Although easy on the eye, he's certainly not easy on the ear. And after a Christmas they would both rather forget, danger and deception threaten Pippa's life in the country.
