Wherever we look today, popular culture greets us with “texts” that make implicit arguments; this book helps students to think and write critically about these texts. The World Is a Text teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to “read” everyday objects and visual texts with basic semiotics. The book shows how texts of all kinds, from a painting to a university building to a pair of sneakers, make complex arguments through their use of signs and symbols, and shows students how to make these arguments in their own essays. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes, instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed. New to the updated compact edition are chapters on fashion, sports, and nature and the environment.

Scholars consider sound and its concepts, taking as their premise the idea that popular culture can be analyzed in an innovative way through sound. The wide-ranging texts in this book take as their premise the idea that sound is a subject through which popular culture can be analyzed in an innovative way. From an infant's gurgles over a baby monitor to the roar of the crowd in a stadium to the sub-bass frequencies produced by sound systems in the disco era, sound—not necessarily aestheticized as music—is inextricably part of the many domains of popular culture. Expanding the view taken by many scholars of cultural studies, the contributors consider cultural practices concerning sound not merely as semiotic or signifying processes but as material, physical, perceptual, and sensory processes that integrate a multitude of cultural traditions and forms of knowledge. The chapters discuss conceptual issues as well as terminologies and research methods; analyze historical and contemporary case studies of listening in various sound cultures; and consider the ways contemporary practices of sound generation are applied in the diverse fields in which sounds are produced, mastered, distorted, processed, or enhanced. The chapters are not only about sound; they offer a study through sound—echoes from the past, resonances of the present, and the contradictions and discontinuities that suggest the future.
