Taking a hard look at where you're at today, your habits, routines and people you associate with, will be a major predictor in what your future will look like—if things don't change.

How to Predict What Your Future May Look Like ... - ryrub.com

To be able to predict, you need to be able to read and understand what has happened, and is currently happening. You need to be able to retrieve and infer ('details stated and implied'), combine this with your knowledge of the world, weigh up probability, and make a sensible prediction of the next outcome. It might come naturally to many, but it's worth breaking it down to look at what's involved.

The Prediction Collection

A prediction, or forecast, is a statement about a future event. They are often, but not always, based upon experience or knowledge. There is no universal agreement about the exact difference from "estimation"; different authors and disciplines ascribe different connotations. Although future events are necessarily uncertain, so guaranteed accurate information about the future is impossible. Prediction can be useful to assist in making plans about possible developments; Howard H. Stevenson writes

The KP index is the most common way to forecast the Northern Lights, and you can use it both for short-term and long-term Aurora prediction. This Aurora forecast indicator (known as "planetary K-index"), is simply a scale to measure the geomagnetic activity that is directly related to Northern Lights visibility.

Northern Lights Forecast - Capture the Atlas

While they are famous for dazzling across the night sky, the northern lights are actually influenced by the activity of the sun. Rodney Viereck of the National Oceanic and Atmosphere Administration (NOAA) in the US explained to Lonely Planet that the sun goes through a roughly 11-year cycle, which includes three to four years of solar maximum. This creates a lot of northern lights activity ...

Predicting Predicting is an important reading strategy. It allows students to use information from the text, such as titles, headings, pictures and diagrams to anticipate what will happen in the story (Bailey, 2015). When making predictions, students envision what will come next in the text, based on their prior knowledge.
