The Black Death resulted in the deaths of up to 75–200 million people in Eurasia and North Africa, peaking in Europe from 1347 to 1351. Plague, the disease, was caused by the bacterium *Yersinia pestis*. The *Y. pestis* infection most commonly results in ...

**Black Death**—Wikipedia

The Black Death was a devastating global epidemic of bubonic plague that struck Europe and Asia in the mid-1300s. The plague arrived in Europe in October 1347, when 12 ships from the Black Sea...

**Black Death**—Causes, Symptoms, & Impact—HISTORY

The Black Death entered south-western England in Summer 1348 and by all accounts struck Bristol with shocking force. 'In this year, 1348, in Melcombe in the county of Dorset, a little before the...

**BBC**—History—British History in depth-Black Death

So many sheep died from the Black Death that there was a European wool shortage. To avoid catching the disease, doctors rejected patients, priests declined to administer last rites, and shopkeepers shut their stores. The Black Death was not an airborne contagious disease and did not thrive during the winters, unlike many sicknesses.

**Black Death** | Definition, Cause, Symptoms, Effects, Death...

There were many theories at the time as to the origins of the Black Death. Some people proposed that the germs of this virulent disease hovered above pools of stagnant water in the swampy marshlands of Asia. Some suggested it started with the Jews polluting drinking water in the growing cities of Europe.

**The Black Death**—Historic-UK

The Black Death swept through the Middle East and Europe in the years 1346-1353 but it may have begun several decades earlier in the Qinghai Plateau of Central Asia. The period of recurring plague...

**What Was the Black Death?** | Live Science

The Black Death was a bubonic plague pandemic, which reached England in June 1348. It was the first and most severe manifestation of the Second Pandemic, caused by *Yersinia pestis* bacteria. The term Black Death was not used until the late 17th century.

**Black Death in England**—Wikipedia

The Black Death was an infamous plague causing an estimated 20 million deaths in Europe. Its spread and impact is disputed, but it does give an insight into a medieval way of life.

Called the Great Mortality as it caused its devastation, this second great pandemic of Bubonic Plague became known as the Black Death in the late 17th Century. Modern genetic analysis suggests that...

**The Black Death: A Timeline of the Gruesome Pandemic**—HISTORY

In the Middle Ages, the Black Death, or 'pestilencia', as contemporaries called various epidemic diseases, was the worst catastrophe in recorded history. Some dubbed it 'magna mortalitas' (great mortality), emphasising the death rate. It destroyed a higher proportion of the population than any other single known event

**The Black Death: Key Facts About The Bubonic Plague**—That...

The Black Death was one of the most feared diseases in the 14th century. It was a type of plague, that was spread via the bite of infected rat fleas. The name Black Death came from the swollen buboes (glands) in the victim's neck, armpits and inner thigh, that turned black as they filled with blood.

**Black Death Facts** | **Black Death For Kids** | **DK Find Out**

The Black Death was an epidemic of bubonic plague, a disease caused by the bacterium *Yersinia pestis* that circulates among wild rodents where they live in great numbers and density. Such an area is called a 'plague focus' or a 'plague reservoir'.

**The Black Death: The Greatest Catastrophe Ever** | **History Today**

The Black Death, also known as The Plague, was a pandemic affecting most of Europe and large swaths of Asia from 1346 through 1353 that wiped out between 100 and 200 million people in just a few short years.

**The Black Death: Causes and Symptoms of the Plague**

The Black Death is the name used to describe the plague epidemic that swept through Europe from 1348 to 1351. One of the most frightening Black Death facts is that it was extremely fatal and spread very quickly. Although the exact death toll can only be estimated based on what we know now, it is thought between 75 and 200 million people died.

**20 Black Death Facts That Will Shock You** | **Facts.net**

The Black Death was an epidemic which spread across almost all of Europe in the years 1346-53. The plague killed over a third of the entire population. It has been described as the worst natural disaster in European history and is responsible for changing the course of that history to a great degree.

**The Black Death: The Worst Event in European History**

The Black Death Plague has left a trail of destruction across 14th century Europe. Survivors confront sickness and scarce resources in a land rife with banditry. Fight for scarce resources and learn new crafting techniques.

**The Black Death on Steam**

The Black Death started in Asia from a bacteria called *Yersinia pestis*. Eventually the rats and fleas got on the boats and were passengers over to Europe. In Europe the fleas and rats spread the disease all throughout the land. I don't know what to do!
