First, this book IS available, from a couple specialty shooting stores. Google for "Ways of the Rifle" and you will see. This book is focused on ISSF-style three-position rifle and air rifle. There is quite a bit of information on rifle adjustment, coat adjustment, etc., that does not apply to other rifle disciplines, but which seems to be in good detail (I don't shoot ISSF).

Canting a rifle isn't a big deal inside 200 or even 300 yards. Past that, it can be a real headache, so get a scope level bubble. A couple of years ago an old hunting mentor of mine lay behind a superbly accurate rifle and aimed at one of the biggest Wyoming mule deer he'd seen in a half-century of hunting big bucks.

Most of the AR-10 rifles made their way to Sudan and Portugal. 1959: ArmaLite Sells the AR-15 Design to Colt; Production Begins. In 1959, ArmaLite finally catches a break, striking a deal with Colt. The company manages to sell both the AR-10 and the new AR-15 designs to Colt Firearms.

It all started because of a rifle. The Rifle is an inspirational story and hero's journey of a 28-year-old U.S. Marine, Andrew Biggio, who returned home from combat in Afghanistan and Iraq, full of questions about the price of war. He found answers from those who survived the costliest war of all -- WWII veterans. It began when Biggio bought a 1945 M1 Garand Rifle, the most common rifle used in WWII, to honor his great uncle, a U.S. Army soldier who died on the hills of the Italian countryside. When Biggio showed the gun to his neighbor, WWII veteran Corporal Joseph Drago, it unlocked memories Drago had

kept unspoken for 50 years. On the spur of the moment, Biggio asked Drago to sign the rifle. Thus began this Marine's mission to find as many WWII veterans as he could, get their signatures on the rifle, and document their stories. For two years, Biggio traveled across the country to interview America's last-living WWII veterans. Each time he put the M1 Garand Rifle in their hands, their eyes lit up with memories triggered by holding the weapon that had been with them every step of the war. With each visit and every story told to Biggio, the veterans signed their names to the rifle. 96 signatures now cover that rifle, each a reminder of the price of war and the courage of our soldiers.

During the Civil War, Mississippi's strategic location bordering the Mississippi River and the state's system of railroads drew the attention of opposing forces who clashed in major battles for control over these resources. The names of these engagements—Vicksburg, Jackson, Port Gibson,

Corinth, Iuka, Tupelo, and Brice's Crossroads—along with the narratives of the men who fought there resonate in Civil War literature. However, Mississippi's chronicle of military involvement in the Civil War is not one of men alone. Surprisingly, there were a number of female soldiers disguised as males who stood shoulder to shoulder with them on the firing lines across the state. Behind the Rifle: Women Soldiers in Civil War Mississippi is a groundbreaking study that discusses women soldiers with a connection to Mississippi—either those who hailed from the Magnolia State or those from elsewhere who fought in Mississippi battles. Readers will learn who they were, why they chose to fight at a time when military service for women was banned, and the horrors they experienced. Included are two maps and over twenty period photographs of locations relative to the stories of these female fighters along with images of some of the women themselves. The product of over ten years of research, this work provides new details of formerly recorded female fighters, debunks some cases, and introduces over twenty previously undocumented ones. Among these are women soldiers who were involved in such battles beyond Mississippi as Shiloh, Antietam, and Gettysburg. Readers will also find new documentation regarding female fighters held as prisoners of war in such notorious prisons as Andersonville.
